

The My Babys Movements Trial

Prof Adrienne Gordon

Centre of Research Excellence in Stillbirth (Stillbirth CRE)
On behalf of MBM Team

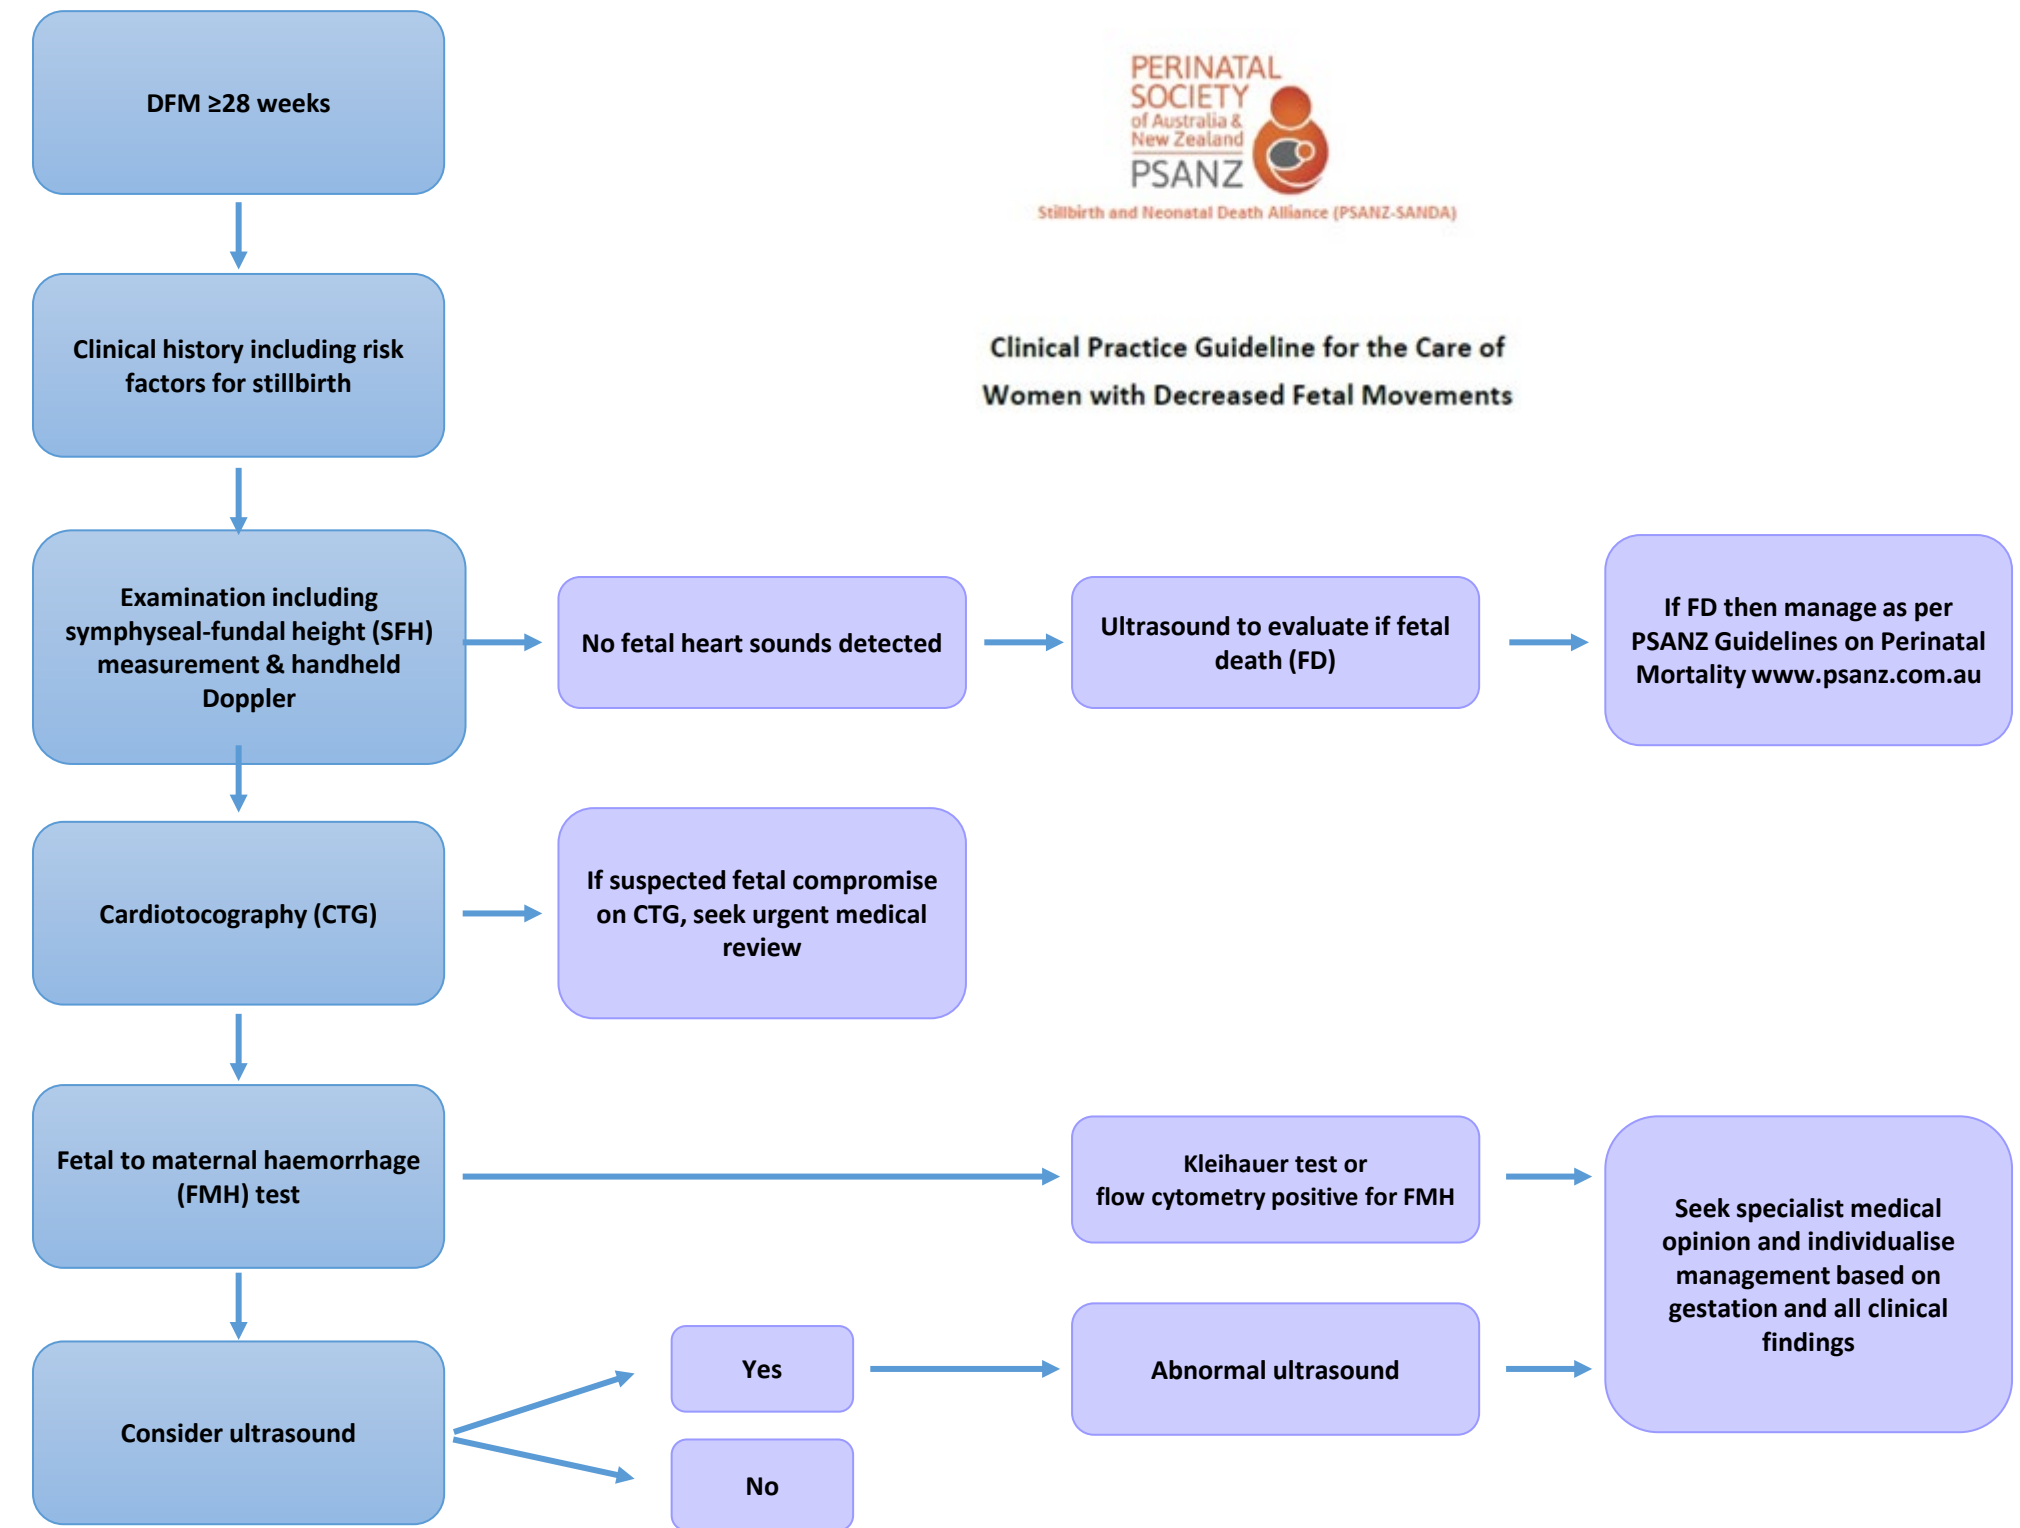

I would like to acknowledge the Traditional Custodians of the land upon which we meet today, the homelands of the Shoshone, Paiute, Goshute and Ute tribes. I pay my respects to Elders past and present and acknowledge and celebrate First Nations people's ongoing connection to country, culture and family.

Summary – MBM Trial

- Large sample size with the stepped wedge cluster designs
- Pragmatic and routinely collected data
- Background of existing guidelines
- Process outcomes are important but harder to collect
- Phone app alone is not enough however some benefits seen in those who did download
- Significant support and champions needed for site engagement
- Consumer engagement could have been greater
- Needs a cost-effectiveness analysis

Summary – MBM and Equity

- Women who used the app were more likely to be
 - In a first pregnancy
 - Born in Australia
 - Of higher socio-economic status
- Women who did not use the app were less likely to
 - Smoke
 - Be Indigenous
